Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 8, 17, and 26 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The above claims recite the transmitter device has no other substantial use other than to submit such a signal. However, the specification (bottom of page 6) describes transmitters, which are "primarily used", not solely used. Is being a paper-weight not a substantial use? Is displaying a menu a substantial use? Is receiving data input and generating a signal to be transmitted a substantial use? It is not clear from the disclosure what should or shouldn't be considered a substantial use. Also, in the method claims, it does not further limit the method.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hall et al. in view of Pong et al.

Hall et al. shows all of the limitations of the claims except for specifying including the make and model of vehicle on the order for customer identification.

Hall et al. shows a method and apparatus for processing orders from customers in a mobile environment. A Mobile Customer Premises Equipment (MCPE) 105 (transmitter, PDA) is used to communicate with the supplier (receiver of the order). From column 2, lines 51-52, "the order includes customer identifying information". Figure 6 goes through the ordering process (codes included).

The examiner considering that some form of a menu is inherent prior to ordering, but if not inherent the examiner takes Official Notice that it is obvious to provide a menu in order to facilitate communication.

Pong et al. teaches, figure 1, an automatic refueling station where (column 6, lines 38-44) make and model are used as identifying information for the vehicle and a customer account number is used to identify the customer. This information is used to better serve the customer in a POS environment.

Based on the teaching of Pong et al., it would have been obvious to one of ordinary skill in the art, at the time the invention was made, to modify the Hall et al. system to include the customer's vehicle make and model as part of the customer identifying information in order to better serve the customer in a POS environment.
